SUMMARY

I'm an entry level Full-Stack (MERN) developer that specializes in both Front-End and Back-End Web Development. I have a strong understanding of HTML5, CSS, JavaScript, TypeScript, ReactJS, NodeJS, and PHP. I am experienced with frameworks like Laravel and familiar with version control systems such as Git. I enjoy exploring different fields of programming such as Game Development and Low-Level Programming.

Soft/Hard Skills: Problem Solving, Touch Typing, Time-management, Teamwork, Adaptability

PROJECTS

Canvas Language
github.com/YousefAhmed-365/CanvasLanguage · January 2024 -June 2024
· Developed an interpreter for a programming language that specializes in rendering graphics.
· Used my skills in C/C++ to write a Recursive Descent Parser.
· Maintained the interpreter and used a profiler to optimize the interpreter and track various kinds of bugs.
